## ABOUT ME

A motivated Junior Java Developer and a recent graduate of PDP Academy's Java Backend program. I possess hands-on experience in building robust and scalable backend systems using modern technologies like Spring Boot, Hibernate, and Docker. I have applied my knowledge of microservices architecture, REST API design, and PostgreSQL database management in both team-based and individual projects. Currently seeking an opportunity to contribute to a dynamic team and grow professionally.

## SKILLS

- **Programming Languages:** Java , C++ (Core)
- **Frameworks & Libraries:** Jakarta EE , Telegram Bot , Spring Framework, Spring Boot, Docker, Spring Cache, Redis , Liquibase , JUnit , Mockito , WebSocket , Minio , CI/CD , Nginx (Core)
- **Databases:** PostgreSQL, MongoDB, Redis
- **Databases: MySQL, PostgreSQL, MongoDB and ORM tools ( Hibernate )**
- **Microservices & Messaging:** RabbitMQ, REST API
- **Version Control:** Git, GitHub

## PROJECTS

### 1. OLX-BACKEND (Team Project)

- **Description:** A backend system for a classifieds platform, developed as a clone of the popular OLX website. This project was built collaboratively in a team of three.
- **Responsibilities:**
  - **Actively participated in designing and developing REST API endpoints for users, advertisements, categories, and messages.**
  - **Collaborated on managing the codebase using Git-flow, creating feature branches, and submitting Pull Requests for review.**
  - **Implemented authentication and authorization mechanisms using Spring Security.**
- **Technologies:** Java, Spring Boot, Spring Security, PostgreSQL, REST API, Git, GitHub, Maven.
- **GitHub Link:** [github.com/olx-dev-team/OLX-backend](https://github.com/olx-dev-team/OLX-backend)

### 2. ONLINE-EDUCATION (Team Project)

- **Description:** A backend for an e-learning platform enabling users (students and instructors) to create courses, upload video lessons, and manage educational content.
- **Responsibilities:**
  - **Contributed to the integration of Liquibase for database migration management and Minio for file storage.**
  - **Assisted in the containerization of the application and its dependencies (PostgreSQL, Minio) using Docker.**
  - **Developed the API endpoints for CRUD operations on courses and modules.**
- **Technologies:** Java, Spring Boot, Docker, Docker-compose, Liquibase, Minio, PostgreSQL, REST API.
